

## **Fork Mounted Sweepers**

Fork Mounted Sweeper - This attachment truly makes industrial sweeping work much easier to finish. The versatile forklift mounted broom is meant for use with either wet or dry material clean ups. It could push snow and squeegee water without difficulty. This particular accessory is normally used in order to clean trash from docks, parking lots, warehouses, construction sites and nearly anywhere it is considered necessary. The forklift sweeper is a low maintenance attachment which uses quick-tite tine products to easily attach to the forklift.
